

Web Site Disclaimer

The information on this web site is for information purpose only, relating to services provided at Allergy and Asthma Associates, Inc. The information is accurate and updated to the best of our ability. The information on this web site is not intended to replace the advice of your doctor. Please consult your doctor directly about advice regarding a specific medical condition. This web site does not provide interactive capability; therefore, please contact office directly with questions or concerns. If this is an emergency please contact 911.

Allergy and Asthma Associates, Inc web site has links to various other web sites that we think might be useful or of interest to you. Third party web sites are not controlled by Allergy and Asthma Associates, Inc. We cannot be responsible for and do not endorse the privacy practices or the contents of those sites. Please read the privacy policy of the sites you visit. Links to those web sites do not constitute or imply endorsement by Allergy and Asthma Associates, Inc of those web sites or services described on those sites.

Allergy and Associates, Inc maintains a Facebook presence and uses social media to interact with our audience. Social media is provided by Allergy and Asthma Associates, Inc as a public service, and is intended to provide useful and interesting information for the patients. Allergy and Asthma Associates, Inc. is not responsible for any third party statements on social media. There may be links to other sites, but we cannot be responsible for and do not endorse the privacy practices or the contents of those sites. Links to those sites do not constitute or imply endorsement of those websites or services they provide. Protecting your privacy is very important to us. The information on social media and posts are public. You can post comments or “like” Allergy and Asthma Associates, Inc. or individual entries. If you comment or click on the “like” button personal identifying information will be visible to other Facebook users. The amount of visible personal information will depend on your own Facebook privacy settings. You can avoid displaying any personally identifiable information by not posting comments and not clicking on the “like” options in Facebook. Do not disclose any personal health material on social media. To protect your privacy if you have any questions or concerns regarding treatment or confidential healthcare information, please call the office directly. Social media should not replace the physician patient relationship. Do not contact the office by means of social media. Those sites are not checked regularly. Please call the office directly with concerns. Call 911 if there is an emergency. Please refer to Facebook privacy policies for detailed information on their policies.
